U.S. Patent and Trademark Office PTO-303 (Rev. 04-01) Continuation of 10. Other: The additional limitations of the hollow underneath and uninterrupted bridge portin is a new issue not claimed before and would require further consideration. However, the limitation appears not to be critical to the invention since a fastener is later added eliminating the hollow underneath and uninterrupted bridge portion and the Owen '998 invention's bridge portion seems functionally equivalent. The Applicant's argument that the Owen '998 invention cannot be made of rolling or pressing metal as taught by the Owen '998 reference is not persuasive since no supporting evidence is provided.
